No More Guessing Games.

Simplify Dependable Asset and Inventory Management with Intelligent RFID Tracking – *Designed to Empower Public Safety.*

Fire and EMS agencies count on every asset within their inventory to uphold public safety.

To best serve communities, these agencies must consistently track mission-critical tools such as vehicles, gear, and medication. However, due to immense pressure based on the nature of their work, assets may be overlooked, forgotten, or broken, enabling drastic – and at times, life-threatening – consequences.

As much as **\$183 billion** is spent in fire protection gear annually in the US.

Fire-grade products compose the **2nd largest expense** for fire agencies.

The average fire truck costs up to **\$350,000 without the ladder.**

EMS teams take an **average of 7 minutes** to arrive at an incident scene.

Delayed treatments are the **3rd most common medical error.**

Poor medication tracking in fast-moving EMS teams enables **narcotic diversion.**

All hands on deck: How RFID ensures your teams have everything they need where they need it most.

Agencies require real-time asset and inventory visibility to make better split-second decisions. Unfortunately, current paper-based and manual documentation systems may not provide this. That's why General Data partners with Zebra Technologies to leverage the benefits of RFID systems, sure to:

- Expand inventory visibility for 99.99% accuracy
- Facilitate replenishment counts and audit compliance
- Reduce the costs of correcting manual errors
- Accelerate documentation and data sharing
- Lower tracking costs by consolidating several identifiers into one tag

Scan. Track. Document.

Between high temperatures, long shifts, and rugged environments, enterprise-ready RFID devices must be designed to thrive in the most challenging conditions to empower public safety teams. Leveraging Zebra's RFID readers and mobile devices, General Data streamlines asset and inventory management with:

RFD8500 Reader

Adaptable to your preferred OS

Scan up to 40k RFID with batch mode

Capture 1D/2D barcodes with intelligent PRZM scanning

RFD40 Sled

Over 20ft read range

30% faster scanning speeds compared to competing brands

Adaptable to your preferred OS

Ultra-rugged RFD90 Sled

Extended read range up to 75ft

Spray-proof, dust-proof, and waterproof

Built-in WiFi 6

Take a visibility a step farther with:

TC7X Mobile Computer

Flexible connectivity options of uninterrupted communication

Omnidirectional scanner and Android OS

Integrated push-to-talk capabilities

L10 Android Rugged Tablet

Up to 24 hours of power ensured through hot-swappable batteries

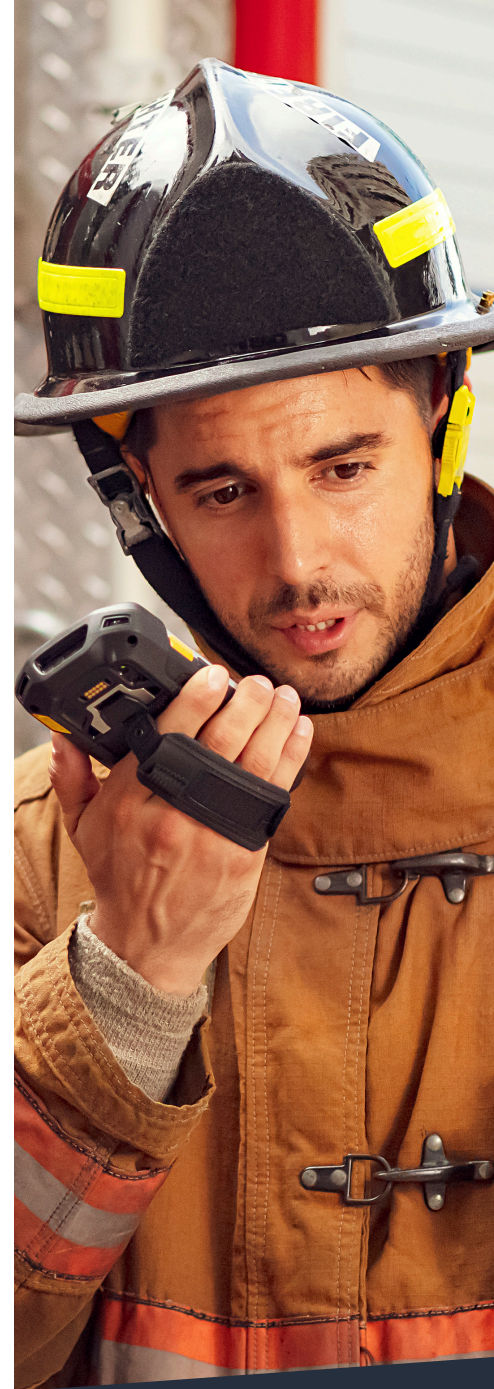

Embedded intelligent scanner available

Glove-friendly touchscreen display

Zebra Certified RFID Tags

Made with pre-tested materials and quality RFID inlays

Eliminate the constraints of effective inventory and asset management in your agency with General Data.
