

Hardware as a Service For PLEX Systems

What is HaaS?

The cost of purchasing barcoding, label printing and data collection equipment can be a significant component of a PLEX implementation or upgrade. This hardware can require a substantial upfront investment and the expense of ongoing maintenance.

This is why General Data's **Hardware as a Service (HaaS)** model is a popular alternative for companies. Rather than purchasing hardware outright or leasing, these essential technologies are provided by General Data for a single monthly fee. Companies get the equipment they need with comprehensive service plans at a predictable and manageable monthly cost.

Benefits of Using HaaS

- **Cost Savings** - Instead of buying the equipment, the HaaS monthly fee is easier to budget for and enables companies to add or subtract hardware from their IT infrastructure without making a long-term investment in it.
- **Expert Support** - Unlike leasing hardware, our HaaS program has equipment maintenance, service and support included.
- **Reduced Load On IT Staff** - Equipment setup, configuration and maintenance are all handled by General Data, freeing up your IT staff to focus on other corporate initiatives.

How HaaS Costs Are Quoted

HaaS is not a "one-size-fits-all" model. In order to provide you with an accurate quote, we will need to first finalize your desired product mix. We'll then review with you the different service options that are available based on the equipment you have chosen. Once that is all specified, a detailed quote will be provided.

Why General Data?

General Data has been designated as the official barcode labeling and data collection hardware provider and integrator for PLEX systems. We are premier partners with the industry's leading equipment manufacturers, with over 25 years' experience supplying and integrating printing and data collection systems.

How To Get Started

To discuss your HaaS options with a General Data systems expert, call us at **1-844-643-1129**. You can also email us at talktous@general-data.com or contact us through our website at www.general-data.com.
