

## HaaS

### Hardware as a Service for Plex Systems

*Hardware can require a substantial upfront investment and the expense of ongoing maintenance. The PLEX model of Software as a Service offers your business countless benefits. Why not use the same model for the hardware component of your PLEX system?*

*General Data's Hardware as a Service (HaaS) model is a popular alternative for companies running the PLEX Smart Manufacturing Platform. Rather than purchasing hardware outright or leasing, these essential technologies are provided by General Data for a single monthly fee. Companies get the equipment they need with comprehensive service plan options at a predictable and manageable monthly cost with no CapX investments.*

#### ■ Immediate & Long-Term Cost Savings

Instead of buying the equipment, the HaaS monthly fee is easier to budget for and enables companies to add hardware to their IT infrastructure without making a long-term investment in it.

#### ■ Expert Service & Support

Unlike leasing hardware, our HaaS program has flexibility for equipment maintenance, service and support to be included and modified as needs change.

#### ■ More Devices for Employees

Use the money you save on initial purchase of long-term equipment to put the latest wearable scanning, mobility, and portable printing devices into the hands of shop floor employees, creating efficiency as well as ownership in your enterprise.

#### ■ Reduced Load on IT Staff

Equipment setup, configuration and maintenance can be handled by General Data, freeing up your IT staff or contractors to focus on other corporate initiatives.

HaaS is not a "one-size-fits-all" model. We first need to meet to determine a completely customized solution that will enable you to get the most from your PLEX Smart Manufacturing Platform. We'll then review available service options based on the equipment you have chosen. Once these are specified, a detailed quote will be provided.

General Data has been designated as the official barcode labeling and data collection hardware provider and integrator for PLEX. We are **premier partners** with the industry's leading equipment manufacturers, with over 30 years' experience supplying and integrating printing and data collection systems.
