NB Series Workstations

The Patented NB Series Mobile Powered Workstation was developed to provide true mobility within a facility. With a compact 24" (610 mm) wide x 26" (660 mm) deep footprint, this ergonomically designed unit can be positioned into the most remote corners.

The NB Series offers maximum flexibility. Each shelf is secured to a slotted upright system and can be repositioned in seconds to suit the operator's needs.

The smallest power package starts with a 40 AH battery, and the largest goes up to a 200 AH battery system. It can power up to 4 electronic devices at once for about 8-12 hours of normal use. (A non-powered version is also available.)

Power Swap compatibility enables the NB Series to power your printers, computers, scales, testers and other hardware 24 HOURS PER DAY. When the NB Series battery power is running low, simply swap out its power system with a fully charged one. This optional feature is ideal for facilities with multiple work shifts. www.newcastlesys.com/powerswap

NB Series shown above with optional second shelf, post-mounted flat screen holder and keyboard tray

A number of optional accessories are available and can be easily integrated in seconds for a highly versatile workstation.

Remote battery/inverter status meter

Slotted support mast

Integrated power strip
