Choose the Size that Best Suits Your Needs

These modular stainers are available by size to allow you to select the number of individual staining positions necessary to meet the needs of your lab or your individual or special staining application. They are produced in 3, 6, and 12 well configurations, and multiple units can be interlocked back-to-back to increase staining volume capabilities. Each SHURStain rack comes with a supply of documentation strips to record stain type, brand, lot#, etc. The number of data positions is proportional to the number of wells.

Lids Allow Easy Access with Minimal Solvent Loss

Sliding lids prevent evaporation by keeping stains covered.
Stainer Accessories

A digital timer attaches directly to the stainer with a convenient bracket. Green and white 250 ml Replacement Wells have sliding lids that open from either end to minimize evaporation.

Protect every life story™ in your lab.
