

Telehealth For Skilled Nursing Facilities

Simplifying Care Delivery & Creating Real Solutions

*Skilled Nursing Facilities need a practical and workable approach to telehealth for their facilities. As a **systems integrator and technology provider**, we wanted a partner dedicated to focusing on delivering an **open, easy to use, affordable care delivery platform**, and found a partner in **Curatess**.*

*Their Telehealth platform was created in collaboration with SNF healthcare providers to ensure **financial benefits, ease of adoption** and **positive, measurable outcomes**. It's now our job to help skilled nursing facilities take advantage of this next generation care delivery solution. Here's how this platform can help:*

■ Reduce Hospital Transfers

Provide integrated telehealth to empower care team members to connect with hospital and post-acute care providers to reduce transfers. You will be able to provide state-of-the-art medical care whenever it is needed to **avoid hospital readmissions** as well as unnecessary ED visits.

■ Retain Revenue

Manage change in condition more efficiently; connect care team members for a telehealth evaluation to manage residents in place (keep residents in the best care setting), producing positive outcomes and **retaining daily revenue**. 90% of the time this platform is used to manage a sudden condition change, the resident is retained in place.

■ Better Access to Care

Provide residents access to their existing care team all hours while providing the care team with access to resident health information using real-time tools. Doctors and care team members using this platform can perform a comprehensive history and exam at any hour from any location and provide the same high level of quality as if the team were at the facility. There is also an *additional safety benefit of providing care in-place during the COVID-19 Public Health Emergency.*

■ Improved Outcomes

The Curatess mobile-first approach seamlessly connects clinicians directly to their patients by using open telehealth, integrated health information, diagnostic tools, and secure messaging. This platform allows clinicians to review clinical information, perform remote evaluations to **make confident clinical decisions for better healthcare outcomes**.

■ Ease of Use

And it's easy! **No special hardware** is required, the platform **operates on any device**, allowing your facility or practice to benefit without a large investment.

■ Ready to Help

Our specialty healthcare team is ready to help; call us at 844-643-1129. Ask for Scott Inge. Or email him at singe@general-data.com.
